##### All Salaried Employee Class

**Notes:**

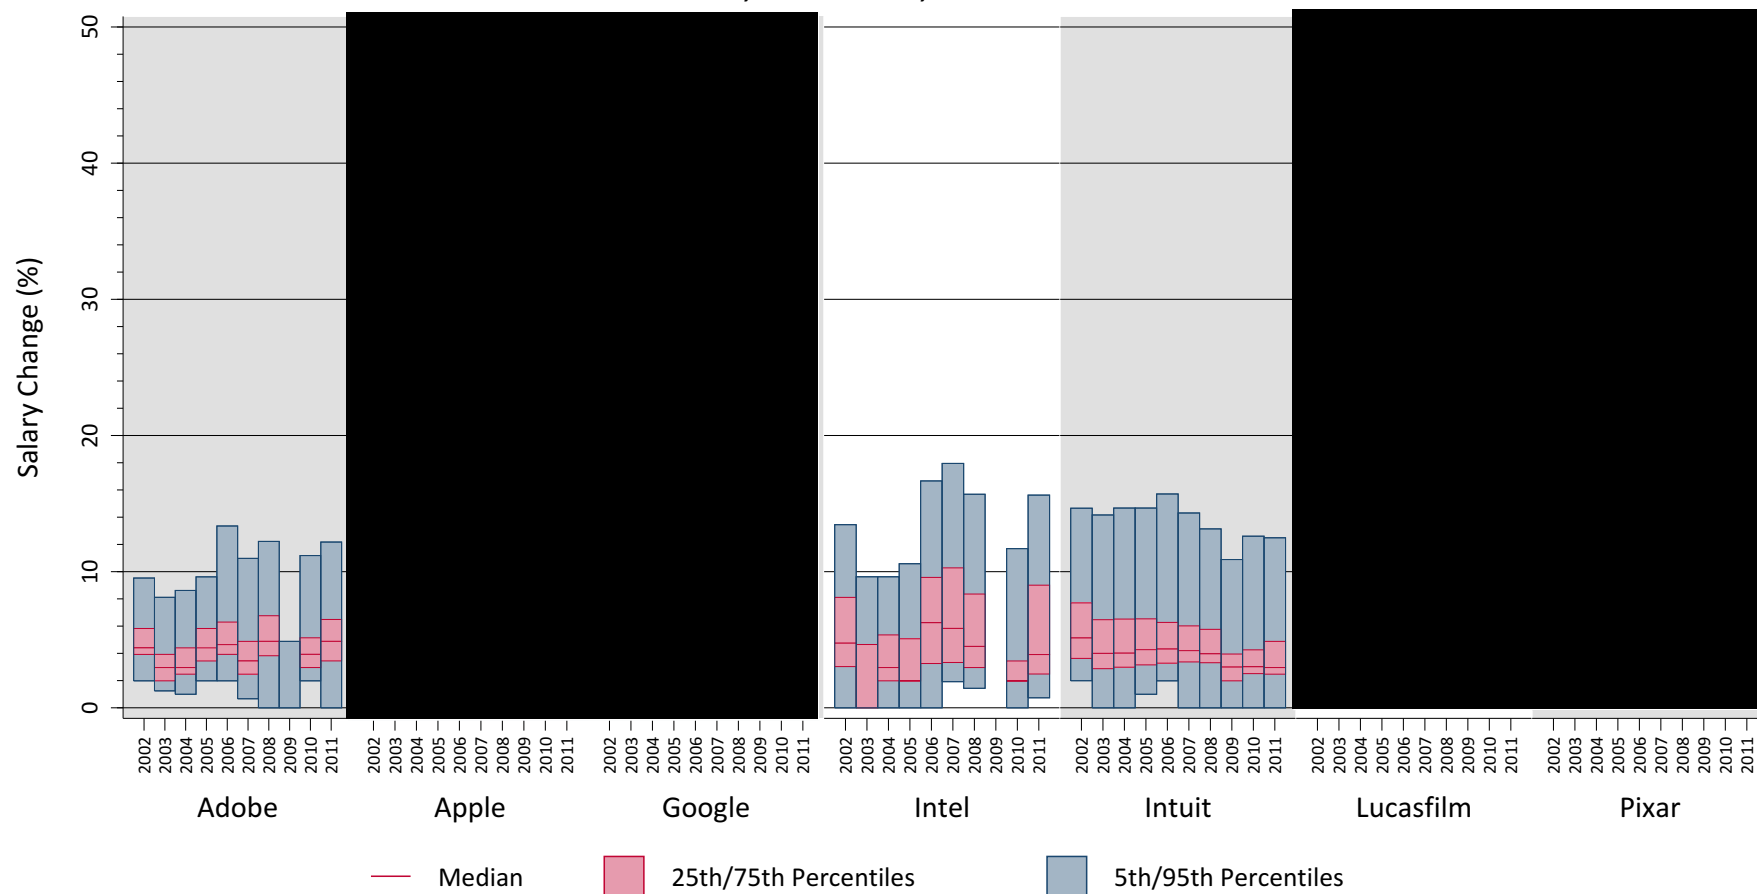

- [1] Percent salary changes are defined as the log of the current year's salary minus the log of the previous year's salary multiplied by 100.
- [2] Some defendants had salary freezes in certain years. The 95th percentile salary change was zero at Intel in 2009; and the 75th percentile salary change was zero at Adobe in 2009, Apple in 2002, and Pixar in 2003.
